

Maths

By Tyson Routledge

Last term in Maths we learnt about Place Value. We learnt everything about numbers like: ordering numbers, some of our times tables, basic facts and comparing numbers. To help us learn our basic facts we played a lot of card games like Rainbow Fact Fish and +123, +10 and even using cards to read numbers. It was a lot of fun.

We also worked on symmetry, we used pattern blocks to create symmetry, continue symmetrical patterns and see symmetry in our environment like butterflies and beetles.
